VIRGIN

FINISHES & TEXTURES

Hand battered, large grain sand casted, physical vapor deposition, gold plating or an eccentric combination of all. We know developing unique finishes take time.

TRUE PARTNERSHIP

Bringing a tabletop vision to life is not easy. We streamline the process for you by prototyping, manufacturing, importing and warehousing product for you thereby saving you time and resources on working with multiple unknown vendors. We can do this because we are the manufacturer, importer and warehouse - fully vertically integrated.

DESIGN & PROTOTYPING

We begin with your sketches and renders and iterate on the design via a prototyping process. This is a collaborative process with you and your team.

MANUFACTURING

Once we have the perfect product, we produce at scale with skilled blacksmiths and braziers

IMPORTING & WAREHOUSING

No more agents and brokers. We import the product for you and you pay a landed duty paid price.
